COVID-19 RT PCR TEST REPORT							
WIMS MRD No				67787886			
Date and time of reporting				09.01.2022 10.00AM			
Referred by- Name of facility/self				DM WIMS			
Specimen Details							
Date & Time of Sample Collection				08.01.2022 11.30AM			
Date & Time of Testing				08.01.2022 4.30PM			
Date & Time of Reporting				08.01.2022 11.00AM			
Reporting Details							
Patient ID	SRF ID	Patient name & Address	Age	Sex	Specimen type	Type of test COVID-19 Result	
P- 2180/20210673338	2180/WYD/2021064336	Muhammed Munawar P T	23	Male	Nasopharyngeal Swab	RT PCR	Negative
Ph:9846720022							
Prepared by Harish PV Senior Microbiologist							
Checked & Approved by Dr. Linda Rose Jose Assistant Professor, Dept. of Microbiology DM WIMS Virology BSL -2 Lab							

Note: The results relate only to the specimens tested and should be correlated with clinical findings. Interpretation guidance:

- 1. Testing of referred clinical specimens was considered on the basis of request/referral received from/ through state surveillance officer (SSO) of concerned State Integrated Disease Surveillance Programme/any other health care facility affirming requirements of the case definition/s or by self.*
- 2. Repeat sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. The repeat specimens may be considered after a gap of 2-4 days after the collection of the first specimen for additional testing if required*
- 3. A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections*

4. Please note that these results are not to be used for any thesis or presentations or publication in any journal without the prior permission of the Director General, ICMR.
